

Cal OES Daily Situation Report

October 21, 2016

On October 21, 1868, a magnitude 6.8 earthquake struck the San Francisco Bay region. Although the region was then sparsely populated, this quake on the Hayward Fault was one of the most destructive in California's history. The 1868 quake devastated several East Bay towns and caused widespread damage in the San Francisco Bay region.

SITUATION SUMMARY

California Department of Public Health Zika Virus and Meningococcal Disease Update

The Medical and Health Coordination Center (MHCC) continues to be activated in response to the Zika Virus Disease and Meningococcal Disease Outbreak. This situation report reflects only Zika Virus activities. The next Meningococcal Disease Outbreak Situation Report will be distributed on 10/27/16.

The California Department of Public Health (CDPH) and Emergency Medical Services Authority (EMSA) are currently the only Emergency Function 08 (EF 08) partners at the state level reporting on this activation.

- The MHCC is coordinating with EF 08 partners, healthcare facilities and local health departments (LHDs) to ensure responses are timely and accurate.
- CDPH and EMSA Duty Officer Programs are monitoring the Zika virus disease outbreak after hours and remain in communication with the Regional Disaster Medical and Health Coordination (RDMHC) Programs and the Medical Health Operational Area Coordinator (MHOAC) Programs throughout California.

Zika Virus

- As of Friday, 10/14/16, there have been 335 travel-associated Zika virus infections in California.
- This number is an increase from 328 cases reported in the last operational period.
- CDPH centers and programs continue to monitor Zika virus disease and provide information to the MHCC related to their specific activities on a weekly basis.

WEATHER OF CONCERN

Weather of Concern

- Red Flag Warnings remain in effect for portions of Southern California through this evening. The combination of gusty northeast winds, very low humidity, and warm temperatures will create critical fire weather conditions for the warned areas.

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

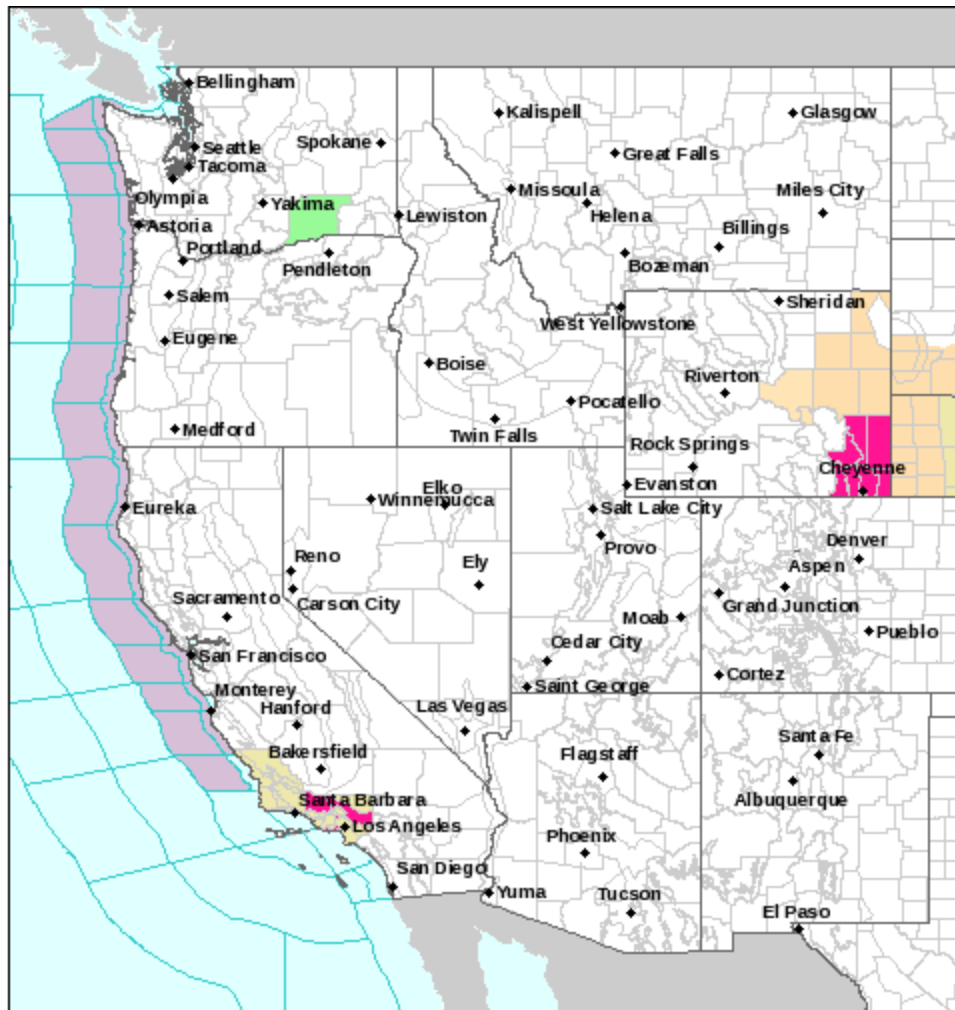

NORTHERN CALIFORNIA

A low pressure trough in the eastern Pacific will produce mild, dry and mostly sunny conditions over most of the region through Saturday. The exception will be far northwestern areas where skies will be partly to mostly cloudy with a few light rain showers at times. On Sunday a stronger front will approach the coast. Afternoon south winds will gust to 35-45 mph in wind-prone areas like Weed. Light to moderate rain will reach the coast late in the day and spread inland overnight through early Tuesday. Mostly areas will see wetting rain from this system, with the exception of far eastern and southern areas. Snow levels will be 6000 feet or higher. The front and rain will pull back to the coastal areas late Tuesday through early Thursday, while other areas remain partly cloudy and breezy. On Thursday a Pacific low pressure system will approach central California and spread rain showers over most of the state by late in the day. Rain is likely to continue in region through next Saturday, with snow levels remaining above 6000 feet.

SOUTHERN CALIFORNIA

The ridge of high pressure that has been over Southern California the past couple of days will move into the Desert Southwest today causing temperatures to remain well above normal, with 70s to low 80s across the mountains and mid 80s to mid 90s in the valleys. Minimum humidity will be mainly in the single digits across Southern California and in the teens across Central California today. Winds will be light today. A Pacific trough will drop down the West Coast bringing a cooling trend and an increase in humidity to the region Saturday through Monday. Scattered showers will move across Southern California Sunday and Monday, with less than a quarter inch of rainfall. Southerly winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Saturday afternoon through Monday evening. A weak ridge of high pressure will build into the region from the south bringing a few degrees of warming and a little lower humidity to the region both Tuesday and Wednesday. A Pacific storm may move into the West Coast bringing significant rainfall and cool temperatures to the entire state late next week.
